1. SDG

Sdg 4: Quality Education - Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

2. Introduction

Problem Identified:

- Students waste time searching for teachers across campus
- No real-time visibility of faculty availability
- Difficulty scheduling doubt-clearing sessions
- Communication gap between students and faculty

Solution Proposed:

- Mobile app with separate student and teacher login
- Real-time faculty availability tracking with status updates
- Dashboard for students to search faculty and request appointments

3. Objectives

- To display real-time availability status of faculty members
- To enable students to find teachers by name
- To facilitate booking of doubt-clearing sessions
- To reduce time wasted searching for faculty across campus
- To improve student-faculty communication efficiency

4. Scope

- Can be implemented in colleges and universities like A.P. Shah Institute of Technology
- Useful for students to connect with faculty easily
- Helps faculty manage their availability and session requests
- Can be extended to schools and coaching institutes
- Applicable for departmental coordination and event scheduling

5. Feature /Functionality

Feature 1: Role-Based Login
Separate login for students and teachers using college email. Secure access with authentication.
Feature 2: Student Dashboard
Search faculty by name or department. View faculty list with details and real-time availability status.
Feature 3: Teacher Dashboard
View requested appointments, manage session requests, and update availability.
Feature 4: Upload Schedule
Teachers can set daily availability for each time slot (e.g., 8:10–9:05). For each slot, they can mark status (Available, Busy, In Meeting, On Leave) and enter room number.

.

5. Feature /Functionality

Feature 5: Profile Management
Students and faculty can view and edit their profile details (name, email, department, staff ID, phone, roll number) with photo upload.
Feature 6: Simple & Clean UI
User-friendly interface designed with Material Design principles, matching the provided mockups.

6. Outcome of Project

- User can login as Student or Teacher using college email
- Students can search faculty by name
- Students can view real-time faculty availability and request doubt sessions
- Teachers can upload their weekly schedule with status per time slot
- Teachers can manage incoming appointment requests
- Both users can edit their profile information

7. Technology Stack

Frontend:
• Flutter (Dart)
• Android Studio
Backend:
• Firebase
Database:
• Firestore (Cloud Database)
Authentication:
• Firebase Authentication (College Email)
Storage:
• Firebase Storage (for profile pictures)

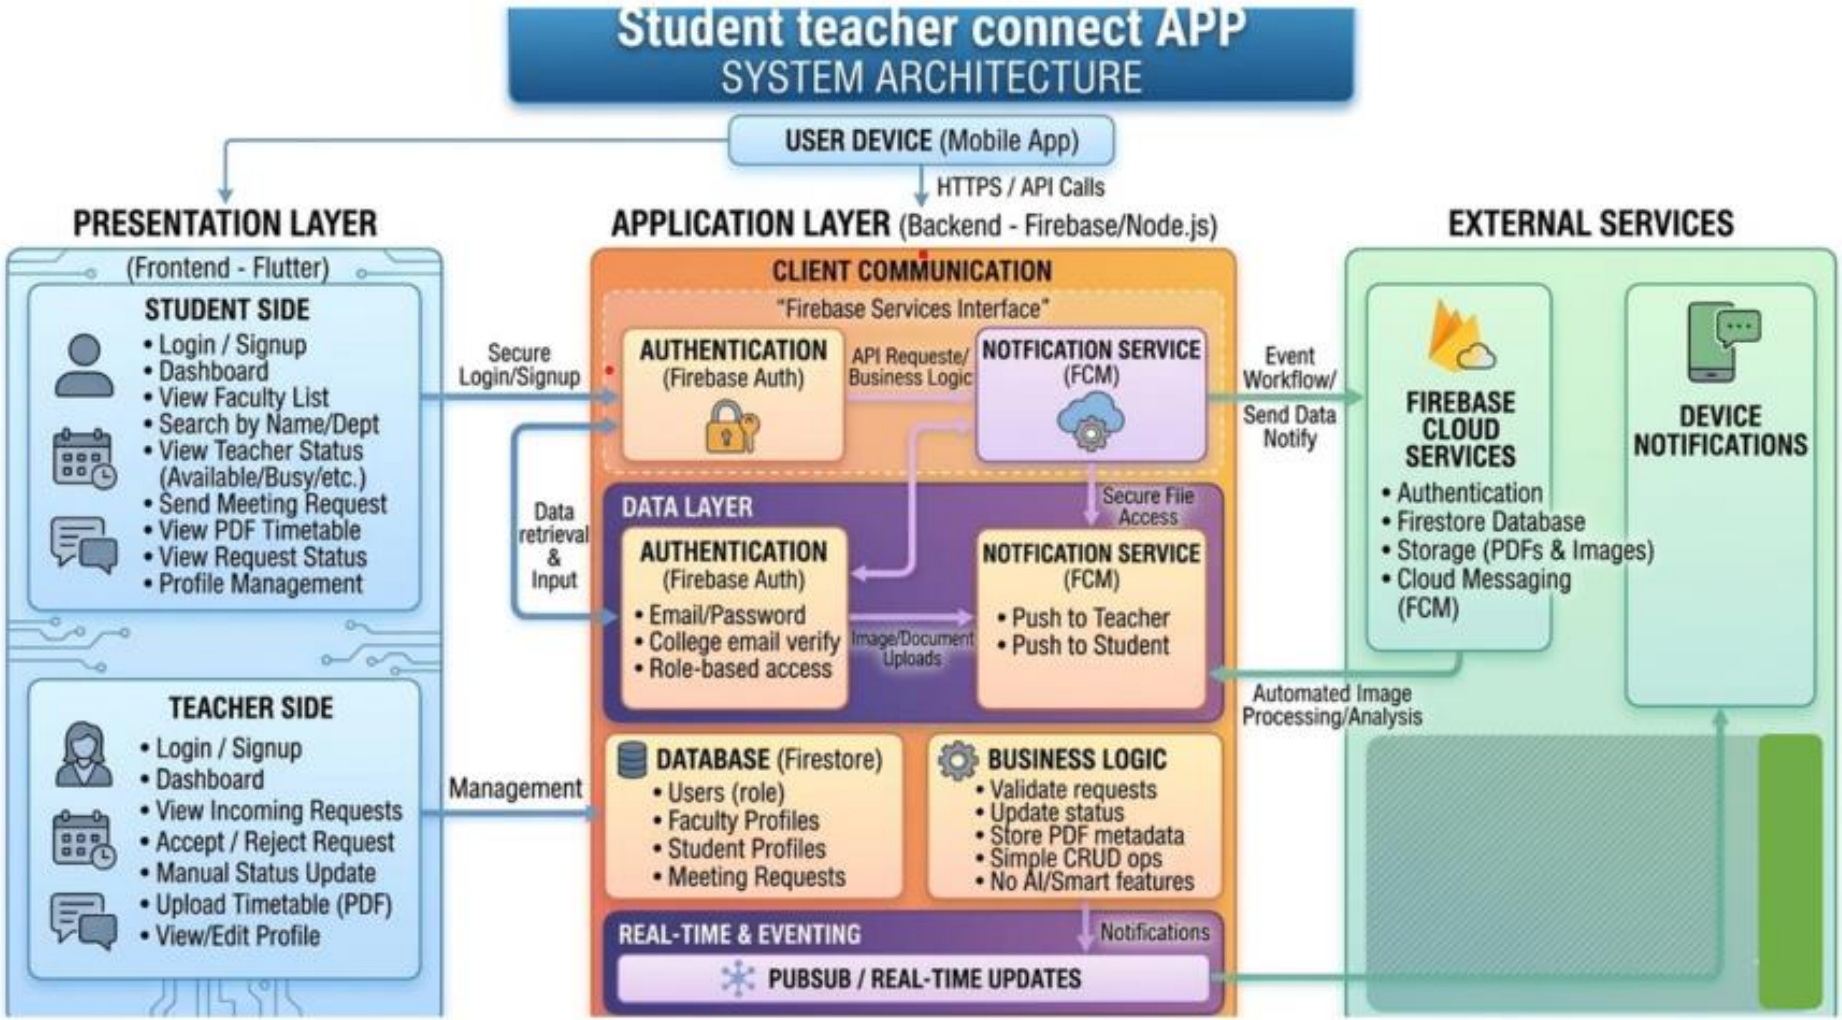
8. Block Diagram



9. Conclusion

In conclusion, the Student–Teacher Connect system effectively solves the problem of communication gaps and difficulty in locating faculty. It enables real-time availability tracking and easy appointment scheduling, saving time and improving efficiency. Built using modern technologies like Flutter and Firebase, the project is scalable and practical, contributing to a better academic environment.

Thank You...!!
